

Press Release**TRIBUN HEALTH ANNOUNCES FULL SUPPORT OF PHILIPS' ISYNTAX DIGITAL SLIDES FORMAT.**

TRIBUN HEALTH ANNOUNCES THE FULL SUPPORT OF ISYNTAX FORMAT INTO ITS CALOPIX AND TELESIDE SOFTWARE SUITES. THIS INTEGRATION WAS MADE POSSIBLE THANKS TO AN AGREEMENT SIGNED BETWEEN THE TWO COMPANIES THAT GIVES ACCESS TO AN INTEGRATION TOOLKIT.

Châtillon, France, February 2nd, 2021 - This integration will foster cooperation between sites having heterogeneous systems as they use more and more digital pathology in all their activities. Being able to combine the installed base of Philips and the innovative software solutions of Tribun Health brings value to end-user and leverages usages.

“We are very happy to add iSyntax to the lists of digital slides that we do support natively in our solutions. It does reinforce our commitment towards an open digital pathology ecosystem where customers are free to select the best combination of products to meet their needs” says Jean-François Pomerol, Tribun Health’s CEO.

Thanks to its vendor neutral Image Management Solutions and Telepathology Platform, Tribun Health is able to accompany any pathology department and research team toward full adoption. CaloPix can now efficiently and genuinely support Philips, Hamamatsu, Leica, 3D-Histech, Roche, Akoya, Huron, Zeiss, Olympus and Motic formats, being one of the most versatile solutions. When available Fluorescence and Z-Stack is fully integrated as well.

This integration will be made available to all customers in CaloPix version 5.0 to be launched this spring and is already in place at specific customer sites.

[About Tribun Health:](#)

Tribun Health empowers confident decisions. The Paris based, privately held company addresses a significant, fast-growing, and unmet need for expert end-to-end pathology department digitalization. Tribun Health is a pioneer in digital pathology workflow solutions with image acquisition (Macro), image storage/organization, web-based image management system (IMS), image analysis using AI-powered deep and machine learning algorithms, remote case sharing with peer review and reporting. Tribun Health’s

extensive, decade long expertise drives confidence for laboratories looking for a seamless transition to a digital pathology suite.
