TRIBUN SUITE

The Next-Gen AI-Powered Computational Pathology Suite for diagnostics, prognosis and drug development.

ULTIMATE CLINICAL CONFIDENCE.
MAXIMIZED LAB PRODUCTIVITY.

Introducing the Tribun Suite, the Next-Gen AI-Powered Computational Pathology Suite **for diagnostics, prognosis and drug development.**

The Tribun Suite is an end-to-end, integrated digital pathology solution developed with one purpose in mind: enable you and your lab to go digital, successfully, at your own pace and within your budget. It fits within your pathology workflow and delivers value that matters to your lab, your pathologists, your clinical clients and ultimately patients.

CLINICAL CONFIDENCE

Leading visualization, analysis automation and collaboration.

ULTIMATE FLEXIBILITY

Open web application, remote working and full compatibility.

INCREASED PRODUCTIVITY

Advanced workflows and AI automation.

tribun HEALTH

Digital Pathology that fits your lab

Digital is the future. Maybe you're just starting to look into it or you've already moved down that path in some way. No matter your progress, your goals, your budget or any legacy technology investments already made in LIS (Laboratory Information System), slides scanners or even IMS (Image Management System), Tribun Health is the ideal partner to help you strategically transition your pathology department to digital, on your own schedule and budget. **The Tribun Suite is the Next-Gen AI-Powered Pathology Suite for diagnostics, prognosis, and drug development.**

A suite built around the pathology workflow.

The Tribun Suite provides some of the most valuable stages of the pathology workflow. This includes gross imaging, digital storage and storage optimization, image management, manual/AI-powered automated analysis and second opinion.

MACRO IMAGE ACQUISITION	GROSSING, EMBEDDING, STAINING	SLIDES SCANNING	STORAGE MANAGEMENT	AI AUTOMATED ANALYSES	ANALYSIS CONSULTATION	SECOND OPINION & EDUCATION	CASE REPORTING

MANAGE IMAGES WITH CALOPIX (CP)

An AI-Powered Clinical decision tool like no other.

CaloPix brings case-centric digital pathology image management, collaboration and quantitative analysis to pathology labs around the world. This application is the heart of the Tribun Suite. Its full power is unleashed when combined with the power of AI automation applications (AIA) and of TeleSlide Patho (TSP) for remote sharing and collaboration.

AUTOMATE ANALYSES WITH AI APPS (AIA)

A suite of AI-Powered Automated Analysis Algorithms, both internal and third party.

Clinical confidence is paramount. Our AI applications help you accelerate and improve image quantification for diagnnsotics, prognosis, and biomarker analysis. Algorithms include Breast IHC, Mitosis, AID, Lung prediction, Prostate by DeepBio, Breast Relapse by Owkin. And new ones are coming on a regular basis.

GET A SECOND OPINION WITH TELESLIDE PATHO (TSP)

Share cases remotely to request a second opinion from peers you trust.

Connect with experts through the TeleSlide Patho application, track, requests, feedback and questions, all from a convenient and secure area. If you need is for education purposes instead of clinical, TeleSlide Learn (TSL) is the alternative application of choice.

ACCESS ONLINE CASE STUDY TRAINING WITH TELESLIDE LEARN (TSL)

Create comprehensive training modules, from case studies to clinical case files to knowledge assessment.

Upload and share image files online: macroscopic and microscopic imagery, digital and radiological slides for your various working groups whether in courses, forums or workshops. TeleSlide Learn is a comprehensive, innovative and efficient educational tool that offers remote access.

MINIMIZE YOUR STORAGE COST WITH CALOPIX ARCHIVE (CA)

Harness the power of our big data storage.

We know that digital pathology produces huge amounts of data which can be difficult and expensive to manage. Whether you select our Microsoft Azure for cloud storage or local storage, we're here to ensure that your precious images are safely organized and economically accessible when you need to consult them. CaloPix Archive is an add-on application module that helps with image storage/access/cost optimization, with significant potential savings.

CAPTURE HIGH-QUALITY GROSS IMAGES WITH MACROCAM (MC)

Gross Imaging is where it all start. Make it count.

Before slide preparation (grossing, embedding, staining), high-resolution photos are taken. Leverage the power of our Macrocam, delivering traceability, versatility and high-image quality, consistently, with integration with CaloPix for image transfer into the suite, seamlessly.

th

Tribun Health. A partner like no other.

The leader in clinical decisions solutions through digital pathology.
